

Project 1 Documentation

Overview

The purpose of the test is to demonstrate good architectural design. The main 2 aspects of such design will be:

- Modularisation: Ability to reuse the module(s).
- Scalability: Extend the functionality of the module(s).

Constraints

Browser support is the latest version of Google Chrome.

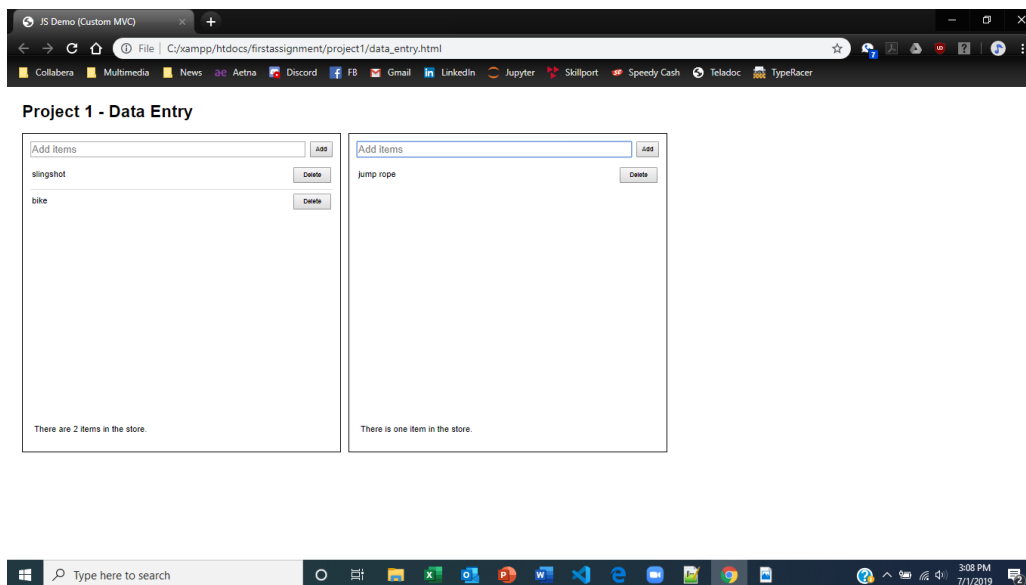

No full frameworks such as Angular or Bootstrap are permitted.

Background

I am an entry-level software developer with a background in computer hardware and system administration.

File Structure

- Data_entry.html
- Styles.css
- App.js
- Controller.js
- View.js

Potential Improvement

- I need to add more CSS elements.
